Askome randiga li

A hand-drawn geological cross-section diagram. The diagram shows a profile with a solid line representing the ground surface. The surface starts at a low point on the left, rises to a peak, then drops to a lower level, and finally rises again to the right. Below the surface, there are three distinct layers separated by dashed lines. The top layer is labeled 'Rödaktig rand', the middle layer is labeled 'Blåaktig rand', and the bottom layer is labeled 'Rödaktig rand'. The layers are drawn with dashed lines, indicating they are inferred or not directly visible. The labels are written in a cursive, handwritten style.

Rödaktig rand
